Other information

About me

I graduated in computer science at the UNISA. I’m a creative and an organized person. I pay attention to the details and I always plan my activities. I love searching new technologies and live new experience. One of my greatest passions is Drawing. At the University I learned new technologies. I also discovered the passion to coding and the Graphics World. I’m interested in experimenting animations and graphics effects.

Interests

I like listening to music and watch good films.
My hobbies are reading and travelling, discovering new places.
